

2018 TOYOTA Hilux 2.8 GD-6 4x4

Hi Peter,

I do apologies for only getting back to you now.

Figures BEFORE INSTALATION:

'inland' or in town I use to get between 13 – 12 L to a 100km

Out land – longish distance – use to average between 12 -11 L to a 100km

(A)

Figures AFTER INSTALATION:

'inland' or in town I use to get between 11 – 10 L to a 100km

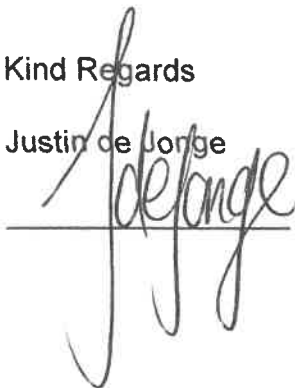

Out land – longish distance – use to average between 10 - 9 L to a 100km

(B)

Think my best was 8.7L to a 100km

Kind Regards

Justin de Jonge
