

MAG-BOOSTA

Magnetic Fuel Conditioners

Help your engine to perform at it's very best while protecting your filter, fuel pump, injectors, EGR valve & turbo.

The simplest, most effective magnetic fuel conditioner available.

- No pipework modifications
- No mounting brackets
- No barbs or hose clamps
- Installs in minutes
- Suits petrol & diesel engines
- Keeps warranty intact

Fitting a Mag-Boosta fuel conditioner will improve fuel combustion, reduce internal carbon and tar deposits, exhaust smoke and tank sediments. It will aid in preventing early filter plugging and fuel pump, injector, EGR valve and turbocharger damage caused by oversized fuel particulates. If the tank is contaminated with any organism, a Mag-Boosta will eliminate the 'tank bug' whilst running the engine. Visible smoke (unburnt fuel) will be reduced, as well as harmful non-visible exhaust emissions.

Our clients all report a smoother, quieter engine with a slight power increase and whilst the Mag-Boost is primarily an engine protection device, our clients regularly report fuel economy improvements ranging from 5% to 15%.

Please email for full information.

- Compact
- Lightweight
- Easy to install
- Fit & forget
- Magnetic Toroidal Field technology in an aluminium composite body.

MAG-BOOSTA SPECIFICATIONS

Model No.	Length x height x width	Hose size 1	Hose size 2	Hose size 3	Weight
